

BATS IN CHURCHES

St Nicholas ARUNDEL Sussex

The Issue

Four bat species have day roosts in the church and cause some mess but the church is generally able to keep on top of cleaning. No covering is needed and the church is content with the bats.

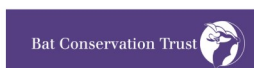

What We Did

The project funded the additional costs due to the presence of bats for roof repairs to the north aisle in 2018. In 2021, a bat management plan was produced by Ecology By Design and additional mitigation has been added to a Heritage Fund project for 2024. External eaves bat boxes will be installed along the north aisle.
