

BATS IN CHURCHES

St Botolph BANNINGHAM Norfolk

The Issue

Banningham has a small number of Common Pipistrelle and Brown Long-eared bats using the inside of the church. The church can generally manage cleaning through their Friends group but were concerned with some potential damage to their two wall paintings.

What We Did

The church were keen on running events and activities to promote the bats and encourage visitors to the church. They were one of our host churches for On A Wing & A Prayer and have shared a range of children's activities and worksheets with the two local schools.

The church have had a new statement of significance, highlighting any potential areas of damage by bats which should help the church prove a need for funding in the future.
