

BATS IN CHURCHES

St Margaret CLEY-NEXT-THE- SEA Norfolk

The Issue

St Margaret's is home to a large colony or well over 100 Soprano Pipistrelle bats, with some Common Pipistrelle and Natterer's bats using the church as well. The church has worked extensively with the Norfolk Bats In Churches project which continues to support them with advice and events.

What We Did

In 2019 we funded a Norfolk Bats In Churches Project bat walk at Cley church, one of the project's very first events.

Unfortunately some changes of personnel have meant we couldn't arrange any more events during the next few years.

We are currently still discussing how we can help support the church to run events or engage with it's bats in the final year of the project.
