

# BATS IN CHURCHES

© Ian Treadgold

## All Hallows DEAN Bedfordshire

### The Issue

All Hallows has a large and diverse bat population. The church community struggles to keep the church clean, and have unofficially closed the church during the roosting season.

### What We Did

The project commissioned Bernwood ecology to work with the church community and architect to produce a bat management plan in 2021. It proposed options to separate the church community from the bats, but given the number, location and diversity of the bats, this will be difficult to implement.
