

BATS IN CHURCHES

St Peter & St Paul HEYDON Norfolk

The Issue

St Peter and St Paul is an estate church with a spectacular suite of wall paintings including the Three Living and the Three Dead and the adoration of the Magi. They have also had recent major restoration

work on their organ. The church has previous records of 200+ Pipistrelles and large colony of Natterer's. Numbers may have been affected by some lighting within the church which has now been removed.

What We Did

We have written a new bat-focussed statement of significance for the church to help with future funding and have provide advice on protecting the organ pipes from debris and advice on cleaning.

The church are well supported by the Norfolk Bats In Churches Project and we have supported them to
