

BATS IN CHURCHES

St John the Baptist PARSON DROVE Cambs

The Issue

The Grade 1 church in the care of the Churches Conservation Trust is fairly affected by bats. The species and roosts include pipistrelle, and Natterer's Bat.

What We Did

The project worked with CCT to hold bat themed events in 2019 and 2020. These were popular and successful, attracting a new audience to the church. No surveys or mitigation were carried out.
