

BATS IN CHURCHES

St Mary STEVINGTON Bedfordshire

The Issue

The Grade 1 church of St Marys has a maternity roost of Pipistrelles and also shelters Natterer's bats. The church community live alongside the bats harmoniously and did not want mitigation.

What We Did

The project has an strong relationship with the church community, and we supported and contributed to a nature weekend in 2022, Stevington Goes Wild. This was a great success. The church community has also participated in a cleaning workshop and Bedfordshire Bat Group have led a bat walk.
