

# BATS IN CHURCHES

## Holy Trinity TATTERSHALL Lincolnshire

### The Issue

The Grade 1 church of Holy Trinity is the richest bat site in the county, harbouring seven species including a maternity roost of over 1000 soprano pipistrelles. The church community makes an asset of its bats.

### What We Did

The project has supported mitigation work in the south aisle to protect important brass effigies from bat damage. We also supported works to prevent bats entering around cracks in the fine medieval door.

In 2023, the project made a £400 contribution to the church's tea bar, a fundraiser that provides information about the bats to visitors.
