

BATS IN CHURCHES

All Saints THEDDLETHORPE Lincolnshire

The Issue

The rural and remote church of All Saints Theddlethorpe is in the care of the Churches Conservation Trust. Listed Grade 1, it shelters Brown Long-eared and pipistrelle bats.

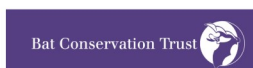

What We Did

The project explored several avenues for supporting the church and limiting bat mess. A report of the state of the stonework in the church was funded by the project and carried out by Skillington's. Options to host community cleans did not materialise, so the report of the main output from Theddlethorpe's involvement with the project.
