

BATS IN CHURCHES

St Mary TYDD Lincolnshire

The Issue

The magnificent Grade 1 listed church of St Mary Tydd shelters a maternity roost of pipistrelle bats. These cause extra cleaning and create some mess.

What We Did

The PCC decided that they did not want physical mitigation as was originally planned. Instead we offered support with cleaning, including holding a mini-masterclass focusing on removing unsightly stains on the important woodwork. The project contact tried to contact the local school and offer a bats in churches workshop, but had no response.
