

# BATS IN CHURCHES

## All Saints WIMBISH Essex

### The Issue

All Saints shelters three species of bat: pipistrelle, Brown long-eared and serotine. The church community cares deeply about wildlife, and although the bats necessitate extra cleaning, they live in harmony.

### What We Did

The project's engagement with All Saints has been in to support church events. These have included brokering a churchyard biodiversity workshop led by Caring for God's Acre in 2021. Over 100 plant species were found in the churchyard.

Essex bat group have led two successful bat evenings, with another planned for 2023.
